

REMARKS

The reason for the above amendments to the specification and drawings is that Figures 2 and 3 are already represented in the Sequence Listing. Particularly for Figure 2, Applicants would have had to retype the entire sequence in order to comply with the draftsman's guidelines. To do so would have led to possible errors. Since the sequences are already in the Sequence Listing, they are redundant if presented also in figures. The amendments to the specification remove any reference to Figures 2 and 3, and change Figure 4 to Figure 2.

None of the above amendment introduce any new matter, and would not require any further consideration. Therefore, it is respectfully submitted that the amendments presented herein are proper, and entry is earnestly requested.

In the event any fees are due with the presentation of this paper, they may be charged to our Deposit Account No. 02-2334.

Respectfully submitted,

Mary E. Gormley
